mira

We help our clients succeed by creating brand identities and digital experiences.

INTRODUCTION

Before the appearance of cryptocurrency, similar systems already existed. Why it is better?

Yes, indeed, such systems existed both 5 years ago and before the advent of the Internet, and they WORK. However, it had several major problems:

1. **Different payment systems constantly blocked the wallets of the participants.**
2. **Manual confirmation of transfers with all the ensuing consequences in the form of the human factor and constant proceedings, who transferred funds to whom and who did not.**
3. **There were restrictions. A person once created a structure and once received money, albeit relatively large. And then all the turns went deep into the structure, and the participant did not get any more.**
4. **Closing or hacking a site meant a system crash, and hacking sites sometimes happened.**

Cryptocurrency and Tron solves ALL these problems:

1. Wallet can not be blocked even in theory. The reverse side of the coin: in no case do not lose control over your wallet. It will be impossible to replace your wallet with others.
2. Public transactions and instant automatic confirmations. The human factor is excluded completely.
3. Closing or hacking the site will in no way affect the operation of the system, since the MIRA smart contract is loaded into the main Tron network, and cannot be deleted by anyone including its developers.

Cryptocurrency and Tron solves ALL these problems:

1. Wallet can not be blocked even in theory. The reverse side of the coin: in no case do not lose control over your wallet. It will be impossible to replace your wallet with others.
2. Public transactions and instant automatic confirmations. The human factor is excluded completely.
3. Closing or hacking the site will in no way affect the operation of the system, since the MIRA smart contract is loaded into the main Tron network, and cannot be deleted by anyone including its developers.

Cryptocurrency and Tron solves ALL these problems:

This means that for the first time in the history of mankind (no matter how loud it sounds), there are real 100% guarantees that the account will not be hacked, and even theoretically when the site is closed, the Smart Contract and the System itself will continue to exist in any case.

More over, any programmer in the world will be able to make a NEW site based on the same smart contract, and any leader of the structure can make a site structure in the same smart contract. Therefore, the system is protected from any actions of the project administration.

Who We Are ?

MIRA (Valuable Digital Asset, Transparent for everyone Arround the World.) is a Blockchain technology company. Our mission is to accelerate the mass adoption of digital assets by bridging traditional and decentralized finance.

What is DeFi ?

DeFi stands for Decentralized Finance. It enables a global, open alternative to every financial service you use today —savings, loans, trading, insurance and more — accessible toanyone in the world with a smartphone and internetConnection.

The world's financial system needs upgrading. In an age of increasing globalization, money transfers still rely on outdated legacy systems. Payment solutions and financial services require numerous intermediaries and are often siloed. Most forms of currency are issued and controlled by centralized governments.

What is DeFi ?

Bitcoin vs. Traditional Finance

Ten years ago Bitcoin emerged as an alternative global payment system. Its value proposition is fairly simple instead of the traditional reliance on centralized banks and third-parties, Bitcoin provides a decentralized, open, and peer-topeer payment system.

The Growth of Decentralized Finance (DeFi)

We foresee an emerging third phase, the Institutional Phase, where Bitcoin is increasingly held as an asset by financial institutions such as banks, hedge funds, pension funds, sovereign wealth funds, endowment funds, and others. Why would they hold Bitcoin? It's a hedging instrument against the risks inherent in centralized fiat currencies, debt instruments, and equities.

The Growth of Decentralized Finance (DeFi)

This Institutional Phase should eventually see even governments' central banks use Bitcoin as a reserve asset alongside gold, fiat currencies, debt instruments, etc. The expansion of the Bitcoin ecosystem over time has translated into a tremendous increase in adoption and value. However, with everchanging transaction fees, high volatility, long confirmation times, and a deflationary economic model, Bitcoin remains a better store of value than a currency for daily use.

TOKENOMICS

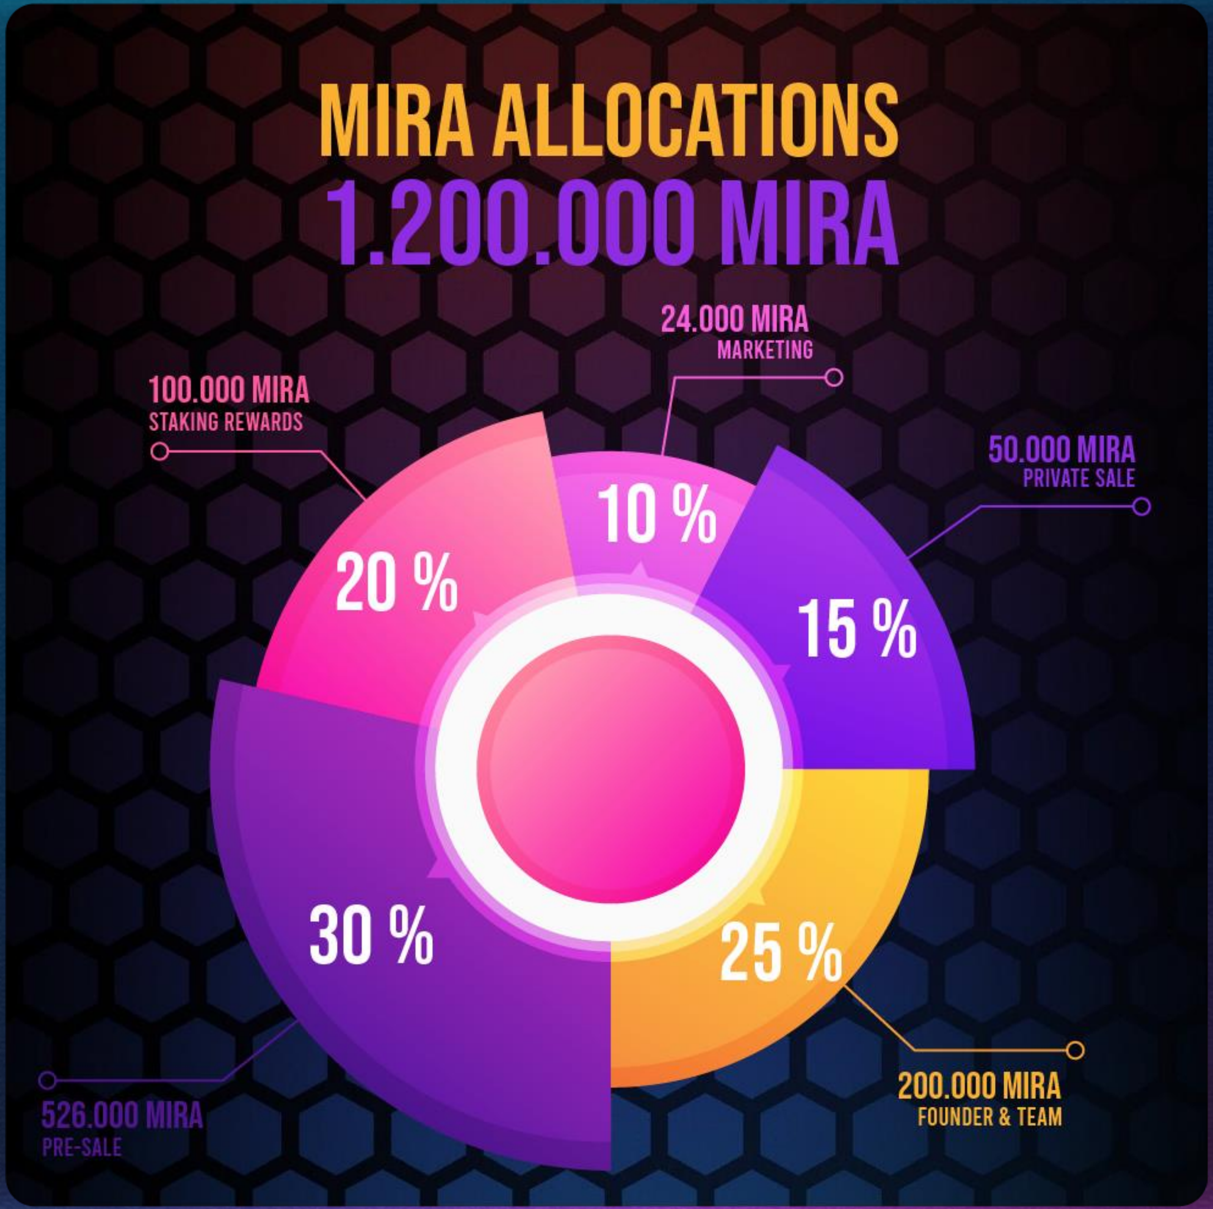
Token contract details:

- **The Mira is built under the Tron Blockchain Network**
- **which makes it an TRC-20 token.**
- **Total Supply : 1,200,000.000000MIRA**
- **Ticker name : MIRA**
- **Decimal : 18**
- **Contract address : TJ6CjSftX7ifUoBtK2VcvAKzcut9cnfrhq**
- **Website : https://mira.id**

DISTRIBUTION

MIRA Token wil be distribution throught 3 phase.

1. One month after MIRA Token Listing on the External exchange. Amount of distribution is 30%
2. One month after MIRA Token Listing on the Second External exchange . Amount of distribution is 30%
3. One month after MIRA Token Listing on the Third External exchange . Amount of distribution is 40%



MIRA ALLOCATIONS
1.200.000 MIRA
24.000 MIRA
MARKETING
100.000 MIRA
STAKING REWARDS
50.000 MIRA
PRIVATE SALE
10 %

ROADMAP

Q4 | 2020

Team Recruitment, Planning, Building Website and Social Media and Private Sale Start

Q1 | 2021

Presale, Prepare Listing On Several Exchanger, Increase Community.

Q2 | 2021

Development Mira Financial Decentralized Project.

Q3 | 2021

Implementation Mira Decentralized Financial Project.

Q4 | 2021

Development Nusantara Marketplace and Gallery.

Q1 | 2022

Prelaunch Nusantara Marketplace and Gallery. Build some anticipation and buzz around the upcoming launch and generate valuable leads

Q2 | 2022

Launch Nusantara Marketplace and Gallery.

Q3 | 2022

Business development from Nusantara Marketplace and Gallery. Collaborate with several artists to work together.

Q4 | 2022

Development Charity program for help other people.

Q1 | 2023

Cooperation with foundations to help children's education.

STAKING

Locked in Staking platform your MIRA and get revenue APR 10%.

Maximum Estimated Annual Yield : 10%

Minimum Locked Amount : 10 MIRA

Unlock Period : Minimum 90 DAYS

Locked Period(Days) :

- **90 DAYS (2.25%)**
- **180 DAYS (4,5%)**
- **360 DAYS (10%)**
